

4 Jet Timer Control Box

kryogenifex

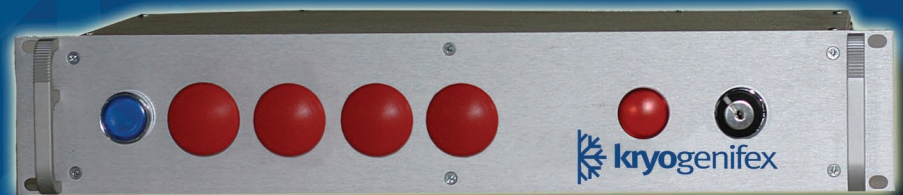

Features:

- 01 19" rack-mount aluminum case
- 02 Gripped Handles
- 03 Universal 110-220 VAC Input
- 04 Industrial 24 VDC Output
- 05 Key selector switch for authorized users - with pilot light
- 06 Illuminated push button for martyr control
- 07 4 mushroom head push buttons for kryojet control.
- 08 Auto pending kryojet control.

The Kryogenifex Automatic Quadruple Jet Control Box features a 19" aluminum rack mount case with gripped handles for easy usage. Equipped with one key selector for authorized users only - equipped with a pilot light and an automated booster control. The AQ Control Box contains four mushroom head buttons with an automatic pending feature for Kryojet self-control. Uses a universal 110-220 VAC Input and an industrial 24 VDC Output for automatic booster, martyr, and Kryojet valve manipulation.
