

230 Kryo Satellite Station

kryogenifex

Features:

- 01 One MPVPTM
- 02 One 230 Tank
- 03 One Booster tank
- 04 One Vent hose
- 05 One Booster hose
- 06 One liquid hose
- 07 One Kryo Satellite

The Kryogenifex 230 Kryo Satellite Station contains one Mini MPVPTM, one booster tank, one 230 tank, and one kryo satellite. The 230 tank is connected to the MPVPTM via liquid hose, for the transference of kryo, and vent hose, for the acceptance of pressure. The Booster tank is connected to the MPVPTM via booster hose, for the transference of pressure to the kryo tank through the MPVPTM. Afterward the MPVPTM is connected to the kryo satellite which upon activation causes a kryostream effect. The 230 tank hold 230 Litters of kryo for a larger amount of kryo for effects.
