

Mini Control Box

kryogenifex

Features:

- 01 Aluminum case.
- 02 Small form factor.
- 03 110 - 220 VAC Input.
- 04 110 - 220 VAC Output.
- 05 Key selector switch for authorized users with pilot light and PV/PTM/MPVPTM control.
- 06 2 momentary mushroom head push-buttons for martyr and kryojet control.

The Kryogenifex Mini Control Box features an aluminum case equipped with a key selector switch for activation by authorized users only which activates the PV/PTM/MPVPTM - equipped with a pilot light. Two mushrooms head push buttons allow the user to control the martyr and kryojets. The Control Box uses both an input of 110 - 220 VAC and 110 - 220 VAC output to manipulate the booster, martyr, and kryojet valves.
