

# MPV

kryogenifex

## Features:

- 01 Industrial strength plastic casing.
- 02 Copper piping.
- 03 Manual system turn off handle.
- 04 Two pressure relief valves.
- 05 Supports up to two liquid nitrogen tanks.

The Kryogenifex Manual Primary Valve is constructed with an industrial strength plastic casing along with copper piping and built with a manual system turn off handle. It allows for use of up to two liquid nitrogen tanks and contains two relief valves for pressure regulation.
