

PTM

kryogenifex

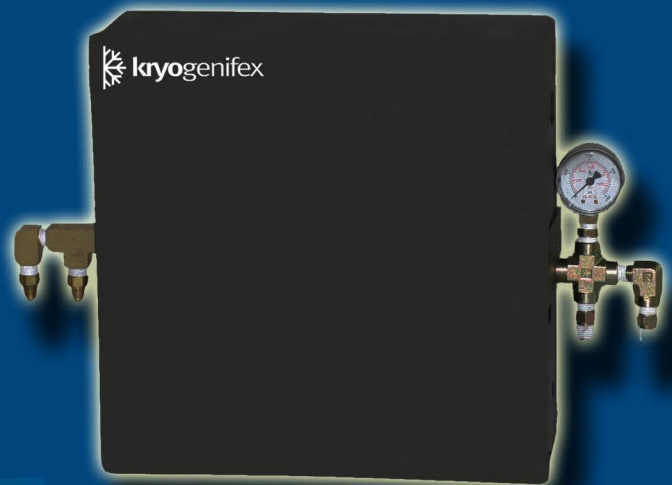

Features:

- 01 Industrial strength plastic casing.
- 02 Copper piping.
- 03 Supports up to two booster tanks.
- 04 Maintains optimal system pressure
- 05 Booster valve controlled

The Kryogenifex Pressure Trigger Mechanism is constructed with an industrial strength plastic casing. It's able to equip up to two booster tanks. The Pressure Trigger Mechanism maintains optimal system pressure when activated. It's activated and controlled by booster valves within the system.
