

TOP Box

Features:

- 01 19" rack-mount aluminum case.
- 02 Gripped Handles.
- 03 110 - 220 VAC Input.
- 04 110 - 220 VAC Output.
- 05 Key selector switch for authorized users - with pilot light.
- 06 Pressure, temperature, and oxygen read out.
- 07 Pressure and temperature booster and martyr control.

The Kryogenifex Temperature, Oxygen, and Pressure Box features a 19" rack mount aluminum case with gripped handles for easy usage. The TOP Box contains a key selector switch for activation by authorized users only - equipped with a pilot light. Included is a pressure, temperature, and oxygen read out along with an automated pressure and temperature booster and martyr control mechanism. The TOP Box uses a 110 - 220 VAC Input and a 110 - 220 VAC Output to manipulate the booster and martyr valves.
